West Park Elementary	\$812.50

Since 1997 the Clean Stormwater Grant program has funded 193 projects. This year the District awarded \$35,303.52 in grants to local schools and community groups. Each project has helped the District increase public awareness of the importance of keeping stormwater clean. The grant program creates and maintains partnerships with local residents and community groups by funding, in whole or in part, projects that preserve, protect, or educate citizens about our water resources – local stormwater ponding basins, canals, creeks, the San Joaquin River and groundwater.
