

Capturing Stormwater since 1956

ANNUAL BUDGET FISCAL YEAR ENDING JUNE 30, 2023

File 160.411

June 22, 2022

Board of Directors Fresno Metropolitan Flood Control District 5469 East Olive Avenue Fresno, CA 93727

Directors of the Fresno Metropolitan Flood Control District,

Annual Budget for the Fiscal Period Ending June 30, 2023

The Budget document submitted for your consideration presents, in aggregate, an allocation of funding necessary for all programs and activities of the District for the fiscal year ending June 30, 2023. The Budget was prepared considering the statutory purpose of the District: to acquire and construct facilities for flood control and the drainage of flood, storm, and other wastewaters and the conservation of any thereof. In that light, the Budget continues to fund capital projects improving the flood control and urban drainage system, including the storage of flood and storm waters. The continued development of staff and operational programs to meet this fundamental purpose has created an internal culture that promotes program improvements and the use of our fiscal and internal resources in the best interest of the statutory purposes of the agency and its constituents.

The Budget:

This Budget document presents, in aggregate, a revenue and expenditure plan for all programs and activities of the District for the 2022-2023 fiscal year. The District's 2022-2023 Budget is a plan of expenditures totaling \$28,546,913, which is balanced using \$27,492,873 in new revenue, and a transfer from the PPDA Trust Fund of \$3,529,000, leaving \$2,474,960 in available resources. The Budget includes input from partner agencies, including the City of Fresno, City of Clovis, County of Fresno, Fresno Irrigation District and Caltrans. Highlights include:

- The District's obligation to maintain approximately 740 miles of constructed pipelines, 157 basin properties, 96 pump stations, 3 flood control dams and 7 flood detention basins remains a top priority. This Budget includes \$3,313,200 to fully fund the District's ongoing operations and maintenance programs.
- Personnel expenses of \$11,132,682 fully funds 77 permanent positions, including salaries and benefits, as well as internships and temporary help positions. As in the prior budget, a reserve is included in the General Fund (\$400,000) to provide funding for unforeseen staffing needs, market adjustments or other administrative needs of the District.

j:\wprocess\peters(pcs)\2022\2022 budget-board-ltr

Letter to the Board of Directors June 22, 2022 Page 2 of 6

- To remain compliant with Federal and State Clean Water Laws, the Stormwater Quality Management program remains a priority for the District, and its Co-permittees, in implementation of its National Pollutant Discharge Elimination System Permit (NPDES). The Budget anticipates the State's implementation of an unfunded mandate for agencies to reduce the trash load within stormwater discharges. This Budget includes \$915,000 for the resources necessary to implement the District's Clean Stormwater requirements. Additional resources for any changes in the regulatory framework that may affect the District over the next five years have been reviewed and considered.
- The District continues to build facilities proposed by the Storm Drainage and Flood Control Master Plan. This Budget contains \$8,986,000 in land purchases, engineering and capital improvement projects. The capital program includes \$3,410,000 in projects related to grants. The planning and design necessary to implement this capital expenditure plan has already begun.
- This Budget includes funding to continue the design of projects planned for construction in the early portion of next fiscal year and to provide the flexibility to adjust project schedules should a currently planned project encounter a delay.

The District's business model continues to reflect a relatively small staff that relies heavily on the outsourcing of work to private companies for professional services, construction, operations and maintenance. Two of the guiding principles of this business model are controlling costs and safeguarding revenues.

Controlling Costs:

Insurance: The traditional model is to buy an insurance policy from an insurance carrier for health, workers' compensation, liability and property damage coverage. The insurance carrier, not the insured, has control over the costs of the policies. The District has used a different approach, capitalizing on its membership with the Association of California Water Agencies (ACWA). One of the highest priorities of the District is public and employee safety. Our focus on safety returns dividends annually in lower costs for administering our liability and workers' compensation programs. Our maintenance and safety programs focus on maintaining facilities to maximize safety for employees and the public. The District partners with the ACWA–Joint Powers Insurance Authority (ACWA-JPIA) to manage our insurance needs. The ACWA-JPIA program pools the liabilities and risk of several hundred water agencies throughout California to provide coverage at substantially reduced costs. The District benefits by receipt of refunds from the Pool for low losses.

Letter to the Board of Directors June 22, 2022 Page 3 of 6

Health Benefits: The cost of employee health benefits continues to increase. The enactment of the Affordable Healthcare Act requires the District to be proactive, responsive to new programs, and aware of changes related to the Act. Because of the need to address the changes, the District implemented an alternative healthcare program in the form of a Consumer Driven Health Plan (CDHP), which combines a high-deductible health plan with an employee-controlled Health Savings Account (HSA). The results of this plan is to offer lower cost healthcare plans to employees and, potentially, reduce District costs.

Contracted Services: Traditional governmental models use public employees to perform many of its operation and maintenance services. This requires the acquisition of tools and equipment to perform such services. Instead of using this model, for decades, the District has outsourced many activities to private companies through competitively bid contracts. Because so many of the services, supplies and products purchased by the District are local, funds stay in the community.

Harnessing Technology: The District has 96 pump stations located throughout its service area. These pump stations are used to move water through the system of inter-connected pipes to facilitate more efficient urban stormwater operations and minimize the impact of storm events on the community. A telemetry system now allows staff to monitor basin water levels and remotely control pumps to move water through the system. The use of portable pumps for such activities has been minimized, except in extreme conditions. Prior to the implementation of the District's telemetry system, this process was manual and required District staff to drive throughout the community to monitor basin water storage levels and manually turn pumps on and off.

Coordination with Partner Entities: The District regularly works with the City of Clovis, the City of Fresno, the County of Fresno, the Fresno Irrigation District and Caltrans to coordinate our Capital program with theirs. The construction of the High Speed Rail system is also adding another element to our coordination efforts. It continues to be our belief that coordinated efforts increases program efficiency, reduces joint project costs and minimizes the inconvenience to the community we serve. In addition, we coordinate with the local Building Industry Association (BIA) regarding any changes to our policies or procedures that might affect the Development community. In 2014, after discussions with the BIA, a Design Review fee was implemented to offset the costs of the development industry on District staff, and is an example of how the District works with the BIA to improve productivity.

Letter to the Board of Directors June 22, 2022 Page 4 of 6

Safeguarding Revenues:

Property Tax: The Fresno Metropolitan Flood Control Act (Act) established a special district that receives a portion of the County of Fresno annual property tax to carry out the objectives of the Act. The District continues to expend these funds for the acquisition and provision of all general benefit services of the District. A five-year forecast is prepared each year to ensure the funding will be sustained to implement the District's purpose.

Benefit Assessment Tax: The Act was amended in 1985 to allow for an alternative method of calculating an annual assessment levy. The assessment was based upon the proportionate benefit to a parcel according to its zone, size and land use. These funds are used within the program areas that provide such benefits. The assessment rates have not increased since 2001 and the District continues to ensure the program benefits are sustained.

Major Program Considerations:

The objective of the Budget is to align program funding with the District's purpose. The District is the direct creation of a <u>citizen action</u> mandating the construction, operation and maintenance of:

- a regional flood control system;
- a regional local drainage system; and
- a water conservation/recharge program.

The Budget must support implementation of these major program responsibilities.

Operations and Maintenance: With an inventory of completed systems valued conservatively at over \$650,000,000, the protection, maintenance and repair of this community wide infrastructure asset is a major and continually growing responsibility of the District. The District maintains its capital inventory of existing urban facilities, which consists of over 740 miles of constructed pipelines and 157 basin properties. It mows about 250 acres of irrigated turf and maintains about 1,760 acres of undeveloped property. Private contractors provide all maintenance services. In addition to mowing and flailing, contractors provide sprinkler repairs, fence repair, rodent control, weed control, and they repair 136 pumps located at 96 pump stations. Also, the District will spend nearly \$150,000 maintaining facilities related to recharging surface water to replenish the underground aquifer of Fresno and Clovis. In addition, \$845,000 will be spent maintaining rural flood control facilities. Overall, the District has proposed a spending plan of approximately \$3.31 million this year in operations and maintenance.

Letter to the Board of Directors June 22, 2022 Page 5 of 6

Clean Stormwater: The Budget includes \$915,000 for the District's Stormwater Quality Management program and, like the Operations and Maintenance program, it outsources to a number of contractors and private sector consultants. A portion of the Budget supports grant funding to our local schools to educate children on the Clean Stormwater program. The District continues to look for opportunities to educate children, and adults, on the District's system and the need to keep stormwater clean. The public education aspect of the Clean Stormwater program spreads the word on what the District does and how it protects the community and our environment.

The District's 157 drainage basins collect runoff from the local neighborhoods and reduce pollutants in the stormwater before it is discharged to local canals and ultimately into the San Joaquin River. The District's system has been used as a model drainage system to manage stormwater. Maintaining the system requires the monitoring of water quality and periodically removing sediment from basin floors. The Budget provides funding to monitor and remove sediments through contracts with the private sector. The State continues to impose new unfunded mandates to improve water quality. The imposition of the removal of trash from stormwater system is being reviewed at this time and funding has been allocated to develop the necessary program elements of this regulation.

Capital Construction: The District uses the competitive bidding process to secure contracts with private contractors to construct all District facilities. This year, approximately \$9.0 million is budgeted for the construction of Storm Drainage and Flood Control Master Plan facilities. In addition, the District has been successful in the receipt of several grants and this funding is being used to improve and reduce the cost of the District's storm drainage and flood control systems. While all of these facilities are critical infrastructure to protect property, the District also encourages secondary water resource management, open space and recreational uses of its facilities.

Overall, the District's management team has a strong commitment to fiscal responsibility, which continues to keep the District financially sound. The District has been successful in retaining employees and maintaining continuity in fundamental service programs. With a seasoned staff, of which 44% have been with the District over 15 years, the work product is very efficient. However, an emphasis on keeping employees engaged was begun to ensure a quality product from each employee and making them desire to give their best efforts to the District. The District uses one-time revenues to support one-time expenditures. The District continues to apply for grant funding to supplement the capital construction program and build important infrastructure. The District has also lessened its use of consultant engineering services and shifted those services internally to maximize workload for staff and improve design efficiencies.

Letter to the Board of Directors June 22, 2022 Page 6 of 6

The District must remain cognizant of new legislation and propositions that may effect, influence, and become a primary driver that changes the District's Program Priorities. The passage of two such programs a few years ago; the Sustainable Groundwater Management Act (SGMA) and Proposition 1 (Water Bond), required the District to keep abreast of important dates and timelines related to this legislation. Due to SGMA, the District is an interested party with the North Kings Groundwater Sustainability Agency (NKGSA); and therefore, was involved in the development of the Groundwater Sustainability Plan (GSP) for the Kings Sub-basin. The Water Bond provided opportunities for additional funding to improve flood management and storage, which the District was successful in obtaining. The District also is keeping apprised of other programs to insure we are prepared when funding opportunities become available.

The District will continue to focus on and plan for urban growth within the City of Fresno and Clovis. The adoption of new General Plans by both Cities has produced the direct need for additional planning of urban storm drainage facilities. The need for annexation of the SEDA area of the City of Fresno and long term planning in urban growth areas must remain a priority.

We remain committed to keeping the Board of Directors well-versed on the implementation of this Budget, including any changes that may affect program funding levels. We will continue to work with other local agencies, community partners, elected officials, and constituents to make strategic decisions that benefit our community during the upcoming fiscal year. District staff believes this budget is a solid plan of expenditures and that it expresses our belief in what we are doing to ensure our service area and the region benefits from our commitment to good flood and stormwater management and the beneficial use of these waters.

Respectfully submitted,

Peter Sanchez

General Manager-Secretary

PS/lrl

OVERVIEW OF THE DISTRICT

INTRODUCTION AND BACKGROUND

Form of Government

The Fresno Metropolitan Flood Control District (District) is a "special act" district, created by the electorate to provide fully coordinated and comprehensive stormwater management and related services on a regional basis through coordination among the Cities of Fresno and Clovis, and the County of Fresno. The legislation that created the District called the *Fresno Metropolitan Flood Control Act*, can be found in Chapter 73 of the State of California Water Code Appendix. Commonly referred to as the "District Act", it was approved by the voters in 1956 for the purpose of acquiring and constructing facilities for flood control and the drainage of flood, storm and waste waters, and for the conservation of those waters.

Service Area

The District is located in the north-central portion of Fresno County between the San Joaquin River and the Kings River. The District is authorized to control stormwater within an urban and rural foothill watershed of approximately 400 square miles, known as the Fresno County Stream Group. The watershed extends eastward into the Sierra Nevada to an elevation of approximately 4,500 feet above sea level. The District service area includes the Fresno-Clovis metropolitan area, and unincorporated lands to the east and northeast (See the Section titled Maps).

For the purposes of program planning, structure, service delivery, and financing, a distinction is made between flood control and local drainage services. The flood control program relates to the control, containment, and safe disposal of stormwater that flows onto the valley floor from the eastern streams. The local drainage program relates to the collection and safe disposal of stormwater runoff generated within the urban and rural watersheds or drainage areas. Collectively, these facilities comprise the Storm Drainage and Flood Control Master Plan.

District History

The sequence of events leading up to the formation of the District as a special purpose agency is part of the region's history, which includes overcoming the destruction from repeated flooding events during the first 100 years of development.

It is remarkable to consider how much of our history has been shaped by the benefits and also the destructive power of water. It was the manmade diversion of water from the Kings River into a series of ditches that laid the groundwork for Fresno County to become the nation's leading agricultural region. Water controlled through dams on the Kings and San Joaquin Rivers has provided hydroelectric power to the region. Today, due to expenditures in infrastructure, our community enjoys water for recreation, agriculture, drinking water, industrial purposes, and landscaping.

The history of our region also includes many setbacks from damage caused by winter storms and melting snow overwhelming the banks of local creeks and streams. Big Dry Creek, Redbank Creek, Dog Creek, Pup Creek, and Fancher Creek flow through the landscape that is today home to some 900,000 people. These streams originate in the foothills of the Sierra Nevada Mountains and enter the valley floor with a generally southwestern direction of flow. While these streams are intermittent, in some years producing little or no flow, in other years fast melting snow coupled with heavy rains cause the banks of the natural channel to overtop and water to flow overland, flooding crops, roads, businesses and homes. The damage caused by these recurring events hampered economic development of the area and threatened public health and safety.

The history of flooding is a long one. In 1884, one year before the City of Fresno was incorporated, the business area and nearly all parts of town were submerged by waters from Big Dry Creek, Dog Creek and Fancher Creek forcing travel by boat in the business district.

In March of 1938, the overtopping of Big Dry Creek caused extensive flooding of the Fig Garden area. Waters ranged in depth from one to four feet, damaging homes, eroding top soil from farms, and contaminating drinking water supply wells from overflowing septic tanks. This flood event brought about the construction of a 16,500 acre-foot reservoir on Big Dry Creek by the US Army Corps of Engineers.

During floods in December of 1955, it was Big Dry Creek Reservoir that prevented catastrophic overtopping of Big Dry Creek; however, Fancher Creek, Dog Creek, and Redbank Creek still flowed uncontrolled into the community causing substantial flood damage. Thousands of people were evacuated from homes on Christmas Day 1955. Coincidentally, earlier that year, the State legislature had authorized, subject to approval by local election, the formation of a new agency called the Fresno Metropolitan Flood Control District. In June of 1956, with the memory of recent flooding on the minds of most, the voters approved, by a 5-to-1 margin, the formation of the District, serving then a 54 square mile area, including Fresno and its rapidly growing suburbs.

The purpose of the new District was to acquire, construct, and operate facilities for flood control, stormwater drainage, and water conservation. The original Board of Directors were faced with the challenge of developing a system to manage runoff in a rapidly urbanizing area and dealing with the uncontrolled runoff in streams heading from the eastern foothills.

Since its formation in 1956, the Fresno Metropolitan Flood Control District, under the direction of a citizen Board of Directors, has implemented a master drainage plan and constructed approximately 740 miles of pipeline, purchased and constructed 157 local drainage basins, and helped purchase, operate, and maintain ten (10) flood control facilities (reservoirs and detention basins).

STRATEGIC PLAN

The mission of the District is to provide to the citizens living within its boundaries, the ability to control and manage the flood, storm, and surface and groundwater resources of the area so as to prevent damage, injury, and inconvenience; to conserve such waters for local, domestic and agricultural use; and to maximize the public use and benefit of the District's programs and infrastructure. Pursuant to this mission, on April 18, 2001, the Board of Directors adopted the following strategic plan.

Fresno Metropolitan Flood Control District Strategic Plan Approved by the Board of Directors					
Our Vision	A completed system of stormwater management facilities providing multiple quality-of-life benefits to our community.				
Our Mission	It is the purpose of the Fresno Metropolitan Flood Control District to control storm and other surface water flows: • Preventing property damage, personal injury and inconvenience; and • Managing such waters for long-term beneficial use within the District				
	District objectives shall be achieved through adherence to the following standards: • Performance excellence by District employees and contractors; • Environmental and economic sensitivity; and • Maximized public benefit through multiple use of District facilities				
Organizational Perspective	◆ The Fresno Metropolitan Flood Control District is a service agency, created and supported by the community to deliver stormwater management and related services. It is the District's task to respond to needs, and the District's object to solve existing problems and prevent new problems, within the time and resource limitations established through community discussion.				
Personnel Perspective	 District employees are the servants of its client constituency, assuring as their personal responsibility the fulfillment of the District's vision, goals, and values. District employees will exercise their responsibilities with an attitude of optimism and a commitment to successful achievement, always focused on meeting needs and solving problems. 				
Our Values	 Our customers are entitled to our best effort Integrity is not optional, nor situational Decisions must be based on facts, not intuition Equity and fairness are the right of all our constituents, and are essential to each of our decisions Competent, committed employees are the District's most valuable resource 				
Our Goals	 Timely provision of needed services through fair and equitable financing Prevention of future drainage/flooding problems Operations and Maintenance programs which ensure public safety and community aesthetics Conservation of storm and other surface water to preserve groundwater and environmental resources Augmentation of public open space and recreation resources through joint use of District facilities Support of economic development within the Fresno/Clovis area Achievement of program goals through close coordination with the County and City of Fresno and the City of Clovis 				
Objectives	 Program and Service Priorities Performance Objectives Annual Budget Long Term Budget 				

Facilities

The District owns and operates facilities that have been designated for flood protection and urban drainage. These facilities are described in this section.

Flood Control Facilities

The flood control protection system is currently composed of ten (10) major flood control facilities and many related streams and channel features. The District is the local sponsor of the U.S. Army Corps of Engineers' (Corps) Redbank-Fancher Creeks Flood Control Project, which consists of five (5) of the system's major facilities. Through its Local Cooperation Agreement (LCA) with the federal government, the District is responsible for construction cost sharing, land acquisition, operation, and maintenance of the Redbank-Fancher Creeks project. The District is also responsible for construction, operation, and maintenance of additional, non-federal flood control facilities required to control the eastern stream group, and for flood plain management.

Big Dry Creek Dam and Reservoir: Located on Big Dry Creek; controls Big Dry and Dog creeks; built in 1948 and enlarged in 1993; gross pool capacity of 30,200 acre-feet; controls up to the 230-year event flood flows.

Fancher Creek Dam and Reservoir: Located on Fancher Creek; controls Fancher and Hog creeks, and several unnamed tributaries to Redbank Creek; built in 1991; gross pool capacity of 9,700 acre-feet; controls up to the 200-year event flood flows.

Alluvial Drain Detention Basin: Located east of Enterprise Canal on Alluvial Drain; controls flows from Alluvial Drain and an unnamed tributary; built in 1993; gross pool capacity of 385 acre-feet; controls up to the 200-year event flood flows. Proposed modifications to the basin will increase the capacity to 674 acre-feet.

Redbank Creek Detention Basin: Located at the confluence of Mill Ditch and Redbank Creek; controls flows from Redbank Creek; built in 1990; gross pool capacity of 940 acre-feet; controls up to the 200-year event flood flows.

Pup Creek Detention Basin: Located west of the Enterprise Canal on Pup Creek; controls flows from Pup Creek and from an unnamed tributary; built in 1993; gross pool capacity of 630 acre-feet; controls up to the 200-year event flood flows. Proposed modifications to the basin will increase the capacity to 785 acre-feet.

Redbank Creek Dam and Reservoir: Located north of the Enterprise Canal at the confluence of the major Redbank Creek tributaries; controls the flows of Redbank Creek; built in 1961; gross pool capacity of 1,030 acre-feet; controls up to the 200-year event flood flows.

Fancher Creek Detention Basin: Located south of McKinley Avenue at the divide of Mill Ditch and Fancher Creek; controls the flows of Fancher Creek and Mud Creek watersheds; currently under construction; gross pool capacity will be approximately 1,891 acre-feet; will control up to the 200-year event flood flows.

Big Dry Creek Detention Basin: Located south of Ashlan Avenue and East of Freeway 168 at the confluence of Big Dry Creek and the Gould Canal; facility shares capacity with Drainage Area "C", CSUF, and Caltrans; controls flows in Big Dry Creek; gross pool capacity is 259.8 acre-feet; helps manage flows in Big Dry Creek originating from rural streams or urban discharges.

Pup Creek Enterprise Detention Basin: Located southeast of Herndon and DeWolf Avenues; purchased in 2012; currently under construction; initial capacity proposed at 50 acre-feet and ultimate capacity of 200 acre-feet; controls flows in Pup Creek.

Dry Creek Extension Basin: Located northwest of Annadale and Brawley Avenues; capable of diverting flood flows from Big Dry Creek and Fanning Ditch; currently under construction on 45 acres with a capacity of 860 acre-feet; improves flood routing throughout urban area.

Local Storm Drainage Facilities

The local stormwater drainage system consists of interconnected surface conveyances, storm drainage pipelines, retention basins, pump stations and outfalls, which discharge to groundwater, irrigation canals, creeks, and the San Joaquin River. The system is designed to retain and infiltrate as much runoff as possible into the underlying groundwater aquifer. At present, the local drainage service area is subdivided into 166 drainage areas (approximately one (1) to two (2) square miles each). Most of these areas drain to a retention basin. Drainage areas, basins, and major outfalls receiving urban stormwaters are shown on the Storm Drainage and Flood Control Master Plan Map, located in the "Maps" section of this document.

The District Master Plan storm drainage pipeline system is designed to accept the peak flow rate of runoff from a two-year intensity storm event (a storm that has a 50% probability of occurring in any given year). When storm events occur that exceed the two-year intensity, ponding begins to occur in the streets until the pipeline system can remove the water. If the storm is of sufficient intensity to generate more water than the street can store, the water will continue to rise until it reaches a topographic outlet where it can escape down gradient. This escape route is a feature of the major storm routing system, implemented in 1998, that protects properties from damage in rainfall or runoff events that exceed system design capacities.

The District requires development proposals to consider the flow path and potential flooding resulting from major storms. The developer must elevate building pads so that finish floor levels are above the anticipated high water elevation and establish an outlet flow path for the runoff of major storms through the use of street improvements, easements, or other public right-of-ways.

The District updated its basin capacity criteria and design standards in June 1982. The design criterion for basin capacity is the storage of six-inches of rainfall at the two-year intensity storm.

Unless necessary to meet operational criteria for a subsequent storm, stormwater is not discharged from retention basins, and the majority of the stormwater percolates into the soil beneath the basin, ultimately, replenishing the under lying groundwater aquifer. When discharges must be made, the District usually discharges into the available natural streams and canals of the Fresno Irrigation District. These channels convey water out of the urban area.

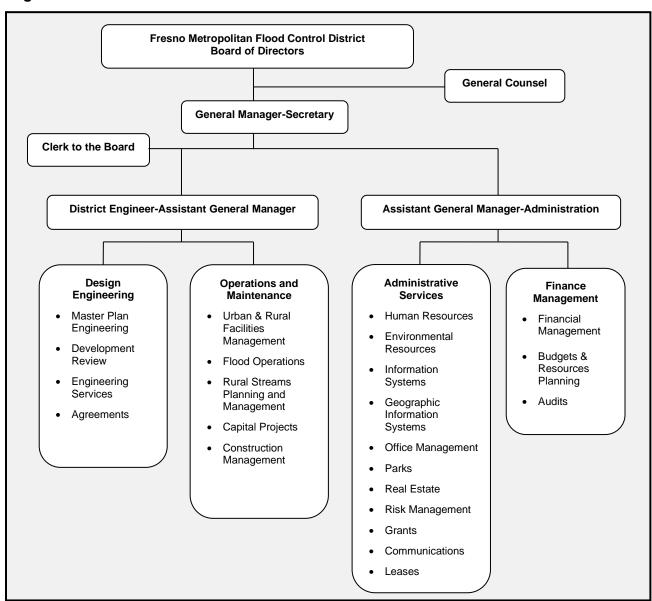

Organizational Structure

Board of Directors

The District is governed by a seven-member citizen Board of Directors. Board Members serve a fouryear term. Four members are appointed by the City of Fresno, two by the County of Fresno, and one by the City of Clovis. Current Board appointments are as follows:

Board Members	Appointing Agency		
Kacey Auston, Chair	City of Fresno		
Lawrence Garcia, Vice-Chair	City of Fresno		
Roy Spina, Jr.	City of Clovis		
Mike Rastegar	City of Fresno		
Raquel Busani	City of Fresno		
Frank Fowler	County of Fresno		
James E. "Buzz" Burleson, Jr.,	County of Fresno		

Organizational Chart

Ex-Officio Officers of District

Pursuant to the Investment Policy of the District, funds (temporary idle cash, trust funds and restricted monies) are placed in the Fresno County Treasury. In accordance with the Fresno Metropolitan Flood Control District's Act, several Fresno County Financial officials, and others as noted, are ex-officio officers of the District.

Excerpt from the Fresno Metropolitan Flood Control Act

Chapter 73-Section 5 – Governing Board; Members

The County Assessor, County Tax Collector, County Auditor and County Treasurer of the County of Fresno, and their successors in office, shall be ex officio officers of the District, and their assistants, deputies, clerks and employees shall be ex officio assistants, deputies, clerks and employees, respectively, of the District, and those ex officio officers shall respectively perform, unless otherwise provided by the Board of Directors, without additional compensation, the same various duties for the District as for the County of Fresno, in order to carry out the provisions of this act.

STAFFING LEVELS AND ASSIGNMENTS

The District currently has seventy-seven (77) full-time authorized positions (78 approved with the 2021-2022 Budget and one position deletion at mid-year budget adjustments). The following section is intended to provide an overview of the organizational assignments and staffing resources allocated to each program area of the District. Current vacancies include: Assistant District Engineer (1), Engineer III RCE (1), Engineering Technician (1), Design Technician (1), Office Assistant (1), and Project Manager (1 unfunded). Part time/provisional vacant positions include: Student Intern II (1), and Student Intern I (1).

The organization is directed by the General Manager-Secretary, who reports to the Board of Directors. The Clerk to the Board reports to the General Manager-Secretary and provides extensive reporting on all meetings of the Board of Directors and acts as the Assistant Secretary. The Assistant General Manager-Administration directly oversees all financial and administrative programs. The District Engineer-Assistant General Manager oversees the Engineering program and Operations & Maintenance programs. Both positions report to the General Manager-Secretary and either can act in that role in the absence of the General Manager-Secretary.

The Assistant District Engineer is currently vacant and will remain vacant for succession planning. The four major program areas of the District include: (1) Design Engineering, (2) Operations and Maintenance, (3) Administrative Services, and (4) Finance Management, which are described below.

Design Engineering:

The Design Engineering section is responsible for coordination of master planning, development review, engineering services, and agreement administration. The program is managed by the Design Engineer, who is also tasked with program coordination among the building industry and local planning officials.

Staffing Level:

- 1 Design Engineer
- 0 Project Manager (vacant-unfunded)

Master Plan Engineering: This program prepares and amends the Storm Drainage and Flood Control Master Plan based on land use and planning information developed by local planning agencies. Specialized analytical tools are used by program staff to locate natural drainage patterns within a watershed and plan storm drainage infrastructure that will maximize efficiency at reasonable costs. In most situations, numerous alternatives are considered before the Master Plan is adopted.

Staffing Level:

- 1 Master Plan & Special Project Manager
- 3 Engineers
- 1 Engineering Technician

Development Review: This program reviews entitlement applications processed by the City of Fresno, the City of Clovis, and the County of Fresno within the District. This includes site plans, conditional use permits, tract maps, zoning changes, grading permits, storm drainage plans, sewer, and other water infrastructure plans.

The entitlement process yields a set of conditions (Notice of Requirements) that must be included in and performed by a proposed development to meet requirements imposed by the District. This process includes the calculation of a drainage fee payment to fund the development's proportionate share of the Master Plan system or the description of storm drainage Master Plan Facilities that will be constructed in lieu of the fee payment.

Staffing Level:

- 1 Development Services Manager
- 5 Engineers
- 3 Engineering Technicians

Engineering Services: This program produces all engineering diagrams in support of the development review process, develop capital infrastructure plans, answer Federal Emergency Management Agency (FEMA) flood zone calls from the public, track the payment of drainage fees on all parcels of land within the District and agreements. They also support the District's Geographic Information System (GIS) by data input, changes, and reporting.

Staffing Level:

- 1 Engineering Services/Agreements Manager
- 1 GIS Technician
- 1 Design Technician (vacant)
- 2 Engineering Technicians

Operations and Maintenance:

The Operations and Maintenance department is responsible for managing and maintaining all District facilities. In addition, this area oversees and inspects the construction of all Master Plan facilities (those constructed by the District as well as by others), coordinates the analysis, development and implementation of programs to manage floodwaters in the rural watersheds, designs capital improvement projects, operates the urban system during storms and oversees the maintenance of all District property.

Staffing Level:

- 1 Operations Engineer
- 1 Chief Hydrologist/Senior Engineer
- 1 Engineering Technician

Rural Streams/Capital Projects: The Rural Streams program is responsible for designing and overseeing the construction of flood control and drainage facilities within the rural watersheds. This includes the design and construction of channel crossings, certification of all levies, the construction of rural infrastructure and improving the flow capacity of streams and channels.

The Capital Projects program oversees the design of all capital improvement projects that are constructed by the District. This includes the design of pipelines, pump stations, basin fencing, landscaping, etc.

Staffing Level:

- 1 Rural Streams Program Manager
- 3 Engineers
- 2 Engineering Technicians (1 vacant)

Construction Management: Master Plan drainage facilities may be constructed by the District or by a proposed development and all must be constructed in accordance with the District's Standard Plans and Specifications. The Construction Management program oversees the construction process, including the inspection of all Master Plan facilities.

Staffing Level:

- 1 Construction Manager
- 2 Construction Technicians/Inspectors

Urban & Rural Facilities Management: This program is responsible for managing all District-owned facilities. The program is divided into three primary areas of work assignment: urban facilities, rural facilities, and the District's office complex.

The urban section is responsible for maintaining all urban drainage facilities, including 157 basin properties in various stages of completion. Within this program is the District's Borrow Material Permit Program, which oversees the excavation of basin properties through a service charge for the removal of dirt to local contractors and developers. The program also administers contracts to provide maintenance of both developed and undeveloped basin sites.

The rural program maintains the ten (10) major flood control facilities and related streams and channels. This program is actively involved in removing debris and excess vegetation from these channels and streams to insure adequate flow capacity.

This program is also responsible for maintaining the District Office complex, including a 24-hour emergency operations center, a boardroom, warehouse, a maintenance facility and staff offices.

Staffing Level:

- 1 Facilities Manager
- 3 Senior Facilities Technicians
- 9 Facilities Technicians
- 1 Telemetry Technician

Flood Operations: Operating the flood control system prior to, during, and after storm events is a critical part of District operations. Resources are allocated based on the stage of the system and forecasted storm intensities. Resources needed to move stormwater, respond to issues, and address public concerns are drawn from existing Operations and Maintenance program staff. When needed, additional staff members may be requested to assist in flood operations.

Administrative Services:

This section is responsible for coordination of a variety of administrative programs, including human resources, environmental resources, information technology, GIS technology, office management, parks, and general administration support. The section is currently managed by the Assistant General Manager- Administration.

Administration: The Administration program coordinates and assists the General Manager-Secretary, Assistant General Manager-Administration and District Engineer-Assistant General Manager with complex administrative tasks. This program coordinates with legal, legislative and regional representatives to address District program issues.

Human Resources, Risk Management, Office Management, Grants, Communications, and the District's Lands Program are managed by the Administrative Services Manager; all other administrative programs are directly managed by the Assistant General Manager-Administration.

Staffing Level:

- 1 Administrative Services Manager
- 1 Senior Staff Analyst
- 1 Staff Analyst

Human Resources and Risk Management: The Human Resources and Risk Management programs assist in the development and implementation of policies, programs and services that ensure the District maintains a stable, productive, safe workforce, and is perceived by the community it serves as an "Employer of Choice". This includes the management and coordination of the employee benefits program.

Staffing Level:

1 – Staff Analyst

Office Management: The Office Management program provides administrative support services to all District programs and the public. This support includes records management, computer assistance, word processing, meeting and travel arrangements, printing and copying, mailings, filing, phone coverage, and related tasks and projects.

The program is responsible for oversight of the office maintenance, equipment, supplies, purchasing of furniture, and participates with all Departments in gathering information to meet the needs of the office.

In addition, the District operates Trolley Creek Park and Oso de Oro Lake Park. Both parks have a Park Attendant assigned to implement park reservations, maintain facilities, report damage, remove graffiti, pick up trash and provide minor maintenance.

Staffing Level:

- 1 Office Manager
- 5 Office Assistants (1 vacant)
- 1 Records/Information Clerk
- 2 Park Attendants
- 1 Park Attendant/Facilities Technician Aide (provisional)

Environmental Resources: The Environmental Resources program assists the District in compliance with environmental statutes and regulations; provides technical and analytical support on issues relating to water quality, biological resources, land use, and hazardous materials management; and recommends measures for incorporation into District projects to minimize adverse environmental impacts while maximizing environmental benefits.

Staffing Level:

- 1 Environmental Resources Manager
- 2 Staff Analysts
- 1 Resources Technician

Information Systems: The Information Systems program is responsible to plan for, purchase, implement, and maintain all computer hardware, software, and networking systems needed by the District. As the highest program priority, Information Systems staff work to ensure computer systems are secure and District assets, including data, are protected from damage, corruption and inappropriate use. This program also provides technical and programming assistance to other programs deploying and using software systems.

Staffing Level:

- 1 Information Systems Coordinator
- 1 Computer Network Technician

GIS Technology: The GIS Technology program provides GIS system design, maintenance, application development support using the ESRI products to prepare imagery, cartographic mapping, and other geospatial analytical support, to internal departments and public/private organizations.

Staffing Level:

- 1 GIS Coordinator
- 1 GIS Analyst
- 1 Systems Programmer

Finance Management:

The Financial Management program is responsible for handling all accounting functions including accounts payable, accounts receivable, payroll administration and all financial and cash transactions. In addition, all the recording and payment of improvement and maintenance contracts, as well as developer agreements, are handled by this program.

Budgets and Resources Planning: The Financial Management program is responsible for facilitating, coordinating and preparing the annual Budget. This includes fiscal planning, analysis of resources, and reporting.

Audits: After the completion of the fiscal year, the Financial Management program coordinates and facilitates the annual audit of the District's financial resources and records. While the audits are conducted by an external auditor, District resources are necessary to organize and provide the necessary fiscal records in a manner that will enable a comprehensive audit.

Staffing Level:

- 1 Finance Manager
- 1 Accountant
- 2 Accounting Technicians

Sources of Revenue

Property Taxes and Benefit Assessment Taxes

Property Tax

The primary funding mechanism for the District was established by the Fresno Metropolitan Flood Control District Act enacted in 1956 by the State Legislature. The Act established an annual property taxing authority to carry out the objectives of the Act. The annual tax levy created was an "ad valorem" property tax to be based on a percentage of the fair market value of a piece of property.

In 1978, Proposition 13 substantially changed how property tax was assessed in California by capping property tax at 1% of the assessed value of the property based on a 1975 valuation date. Additionally, Proposition 13 limited increases in the property value for assessments up to 2% in any one year. For example, if the fair market value of a property increases by 5% in one year, the value used for tax assessment would be limited to a growth of 2% in that year.

As a result of Proposition 13, County Assessors no longer track the fair market value of individual property for property tax assessment purposes. In the years following Proposition 13, the District received "bail out" money from the State. Beginning in 1983, the District's share of property tax was significantly reduced by mandatory contributions of property tax to the Special District Augmentation Fund (SDAF). Faced with huge State budget deficits in 1992-1993 and 1993-1994, State officials began shifting property taxes from local governments (cities, counties, special districts, and redevelopment agencies) to schools thru the Educational Revenue Augmentation Fund (ERAF) in each county. For 2021-2022, the District's ERAF contribution was \$8,736,399.

Property taxes of the District are to be expended for the acquisition and provision of all general benefit services including:

- Area-Wide Drainage and Flood Control Services and Facilities
- Water Conservation and Groundwater Recharge
- Storm Drainage and Flood Control Master Planning
- Stormwater Pollution Controls
- ◆ Development Review for Compliance with Storm Drainage and Flood Control Master Plan
- Public Information
- Engineering Data Systems
- Administration

Benefit Assessment Tax - Flood Control System Project Assessments

Because of reduced property tax allocations and the need to fund the local cost share of the Redbank-Fancher Creeks Flood Control Project, in 1985, the Fresno Metropolitan Flood Control District Act was amended to allow for an alternative method of calculating an annual assessment levy. The alternative method authorizes an assessment based upon the proportionate benefit to a parcel taking into account its zone, size, and land use, with respect to all other parcels in the District. The first benefit assessment was authorized by the District's Board of Directors on June 29, 1987 after a multi-year and very comprehensive study by a citizen's advisory committee (Resolution 1373). The committee recommended, and the Board of Directors adopted, a fee structure that took into consideration land use of a parcel as well as the parcel's zone of benefit.

Land Use Categories include the following:

- Single Family Residential
- Multi-Family Residential
- Rural Residential
- ♦ Commercial/Industrial
- Irrigated Agricultural
- Non-Irrigated Agricultural

Zones of Benefit included the following:

- ◆ Zone 1 Flood Plain Benefit Zone
- ♦ Zone 2 Water Resource Benefit
- ♦ Zone 3 Indirect Benefit Zone
- ◆ Zone 4 Upland Watershed

The map identifying the Benefit Assessment Zones is located in the "Maps" section of this document.

The following is a general chronology of changes to the assessment tax since its initial adoption in 1987:

- 1987 Initial adoption of the Assessment Tax (Resolution 1373).
- 1993 The assessment tax rate is updated to address property tax loss to the State through ERAF, increased operation and maintenance costs, and to help fund federally mandated stormwater quality programs (Resolution 1703).
- 1997 Assessment Tax Update (Resolution 97-112).
- 2000 The rate assessed to properties were increased in Drainage Areas "II" and "RR" to fund infrastructure upgrades, including repayment of a 20-year California Infrastructure and Economic Development Bank (CIEDB) Loan. The assessments also included funding for capital projects in those drainage areas. (Resolution 2000-238).
- 2001 Assessment Tax Update (Resolution 2001-282).
- 2004 The assessment tax rate for Tracts 1633 and 1645 in Drainage Areas "BH" and "BM" were increased to the maximum amount at that time authorized by the District Act to fund an improved drainage system in cooperation with the County of Fresno. The tax rate is the same as the rate used in Drainage Areas "II" and "RR".

The current rates used to calculate the benefit assessment tax are included in the following table.

		Primary District		"111,	"II1/RR" & "BH/BM" Sunnywood		
Categories	Rate Factor	1	2	3	1	2	3
Single Family							
Undeveloped							
0 to < 1.5 Acres	Flat Rate	\$14.08	\$11.10	\$9.88	\$21.86	\$17.22	\$15.34
1.5 to 19.99 Acres	Flat Rate	\$11.04	\$7.32	\$4.90	\$17.14	\$11.34	\$7.60

Non-Irrigated All Parcels (\$1.00							
minimum)	Per Acre	\$0.50	\$0.36	\$0.28	\$0.76	\$0.54	\$0.44
Special Assessment							
All Parcels	Per Acre	\$51.92	\$41.42	\$39.00	\$80.58	\$64.26	\$60.52

Other Sources of Revenue

The District receives revenue from fees, grants, transfers from the PPDA Trust Fund and revenues from the use of District assets (rents from leased land, interest, etc.). The two (2) largest sources of revenue in this category are grants and service charges generated from the Borrow Material Permit Program, currently set at \$0.90 per cubic yard of material.

THE BUDGET

The Fresno Metropolitan Flood Control District Act requires the Board of Directors to develop a budget.

Excerpt from the Fresno Metropolitan Flood Control Act

Chapter 73- Section 22 - Estimate of Money Needed

The Board of Directors shall, not later than the beginning of each fiscal year, prepare an estimate in writing of the amount of money needed for the objects and purposes of the District for that fiscal year. The estimate shall include the estimated amount required to pay the expenses of the District, the cost of maintenance and operation of any works maintained or operated by the District or under its authority, the amount of any indebtedness (other than bonded debt) of the District currently due or to become due in such fiscal year with interest, if any, payable thereon, the amount deemed necessary by the Board of Directors for a reserve fund to meet the expenses of the District during the first six months of the next subsequent fiscal year, and the estimated amount necessary for the payment of the costs of any action or proceeding which may be taken by the District, including the cost of employment of attorneys and engineers. The estimate may for convenience be called the "annual budget". A copy of the estimate shall be filed with the Board of Supervisors of the County of Fresno and the auditor thereof not later than the tenth day of July of such fiscal year. There shall be added to the estimate the amount required to provide for the payment of principal and interest of outstanding bonds of the District and the payment of principal and interest of bonds authorized but not sold but which the Board of Directors believes will be sold during the first six months of such fiscal year. (Stats. 1955, c. 503, p. 981, § 22. Amended by Stats. 1985, c. 1229, § 6, eff. Sept. 30, 1985.)

FUND STRUCTURE

The District, like other state and local governments, uses fund accounting to demonstrate finance related legal compliance. All of the funds of the District are governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the District's government-wide financial statements. However, unlike the government-wide financial statements, governmental funds financial statements focus on near-term inflows and outflows of spendable resources as well as on balances of spendable resources available at the end of the fiscal year (Fund Balance). Such information is useful in determining what financial resources are available in the near future to finance the District's Capital Projects. The District maintains several individual governmental funds organized according to their type (general, debt service, capital project and special revenue fund).

General Fund

The General Fund is the primary operating fund of the District. All operating revenues and expenses are recorded in this fund. Examples of revenues recorded in the General Fund include property taxes, benefit assessment taxes, grants, and fees and service charges (excluding drainage fees).

Expenses recorded in the General Fund include all personnel costs, professional expenses, operations and maintenance costs, insurance, equipment purchases and improvements to the office complex. Transfers from the General Fund are the primary funding sources for the Capital Projects Fund and Debt Service Fund.

Capital Projects Fund

The Capital Projects Fund is used to account for resources to construct capital facilities associated with the Storm Drainage and Flood Control Master Plan. Within the Capital Projects Fund are the following sub-funds:

- Urban-Rural Construction Fund This fund is used to construct flood control and storm drainage facilities. The Benefit Assessment Tax transferred from the General Fund is the primary funding source. A secondary funding source is special transfers from the PPDA Trust Fund, the Park Construction Fund or the Land Sale account.
- ◆ Park Construction Fund The Park Fund contains resources designated for specific park improvement projects. This fund historically received resource from the General Fund that were a result of cost savings related to sponsorship of park maintenance expenses.
- ◆ Land Sale Account The Land Sale fund is used to fund future land purchases. The primary funding source are the proceeds from the sales of land. The original funding source was the sale of approximately 97 acres of the Redbank Creek Detention Basin Spoil Site parcel in 2009.

Debt Service Fund

The District uses a Debt Service Fund to account for those resources used to retire the California Infrastructure Economic Development Bank loan. Funding comes from the General Fund.

BUDGET PREPARATION PROCESS AND SCHEDULE

General Manager-Secretary facilitates a three-day planning retreat with Program Managers to review current program objectives, evaluate progress on projects, and set priorities for the upcoming year. The updated program objectives become the starting point for planning the upcoming budget.

April - May 2022 – Preparation of Departmental Budgets

Program Managers begin planning expenditures for the upcoming fiscal year. During this time period, the following things happen:

- The Program Managers will facilitate meetings with the major program divisions to review existing staffing levels and other resource needs and make recommendations for all adjustments, including the addition of new staff, reallocation of existing staff, promotions, and market adjustments. Information will be presented to the General Manager-Secretary for inclusion in the Budget as necessary.
- ♦ The Engineering staff will develop a capital budget. The Budget will take into consideration the coordination of priority projects to be completed by, or in conjunction with, the City of Fresno, City of Clovis, and the County of Fresno.
- Annual revenue projections are calculated by the Finance Manager.

April 11, 2022 – General Manager-Secretary Review of the Budget

The General Manager-Secretary begins the process of reviewing the Budget in its entirety. As each program is evaluated, adjustments are made to align priorities with direction from the Board of Directors and program needs.

May 11, 2022 - Public Notice to be published pursuant to the Government Code

A public notice is published pursuant to the Government Code announcing the scheduled date and time for the Board of Directors to review the draft Budget at the Budget Workshop.

May 12, 2022 - Board Priorities & Programming Committee Meeting

The Board Priorities and Programming Committee meets to review the capital improvement program.

May 16, 2022 – Administrative Committee Meeting

The Administrative Committee reviews the Draft Budget. In addition, staffing recommendations regarding personnel are reviewed, including new positions, promotions, cost of living adjustments, market adjustments, and other items related to personnel.

May 27, 2022 - Distribution of Draft Budget to the Board of Directors

A final draft of the Budget is distributed to the Board of Directors.

May 31, 2022 – Draft Budget Available to the Public

The District's partner agencies and interested parties are notified that the Draft Budget is available for review on the website. In addition, a copy of the Budget is made available to the public at the District's office and on the website.

June 1, 2022 – Board Meeting – Budget Workshop

A public budget workshop is held to review the Draft Budget. At this time, any changes from the Administrative Committee are considered by the full Board of Directors and included as directed.

June 8, 2022 – Public Notice to be published pursuant to the Government Code

A public notice is published pursuant to the Government Code announcing the scheduled date and time for the Board of Directors to consider adoption of the final Budget.

June 22, 2022 - Board Meeting - Budget Hearing

A public hearing is held to consider final adoption of the Budget.

June 23, 2022 – Budget Transmitted to the County

The final adopted Budget is transmitted to the County of Fresno.

BUDGET SUMMARY

The District's 2022-2023 Budget is a plan of expenditures totaling \$28,546,913, which is balanced using \$27,492,873 in new revenue, and a net transfer from the PPDA Trust Fund of \$3,529,000, leaving \$2,474,960 in available resources. The Budget includes input from partner agencies, including the City of Fresno, City of Clovis, and the County of Fresno.

- ♦ The District continues to focus resources on accelerating Storm Drainage and Flood Control Master Plan capital improvements. The Budget contains \$8,986,000 in capital improvement projects, including three (3) basin purchases. The planning necessary to accomplish this objective has already begun.
- Staff will continue to do advanced design to have approximately \$1 million of shelf-ready projects available throughout the year.
- ♦ This Budget includes resources necessary to continue development and updating of the Storm Drainage and Flood Control Master Plan to provide adequate protection of property.
- As the urban area has continued to grow, the District's obligation to maintain the constructed pipelines and basin property continues to increase. This Budget includes \$3,313,200 to fully fund the District's ongoing operations and maintenance programs.
- The Stormwater Quality Management Program remains a priority for the District and its Copermittees. This Budget provides all necessary resources to remain compliant with federal and state regulatory requirements. Additionally, the Budget provides resources necessary to plan for changes in the regulatory framework that are likely to impact the District over the next five years.
- ♦ Personnel expenses of \$11,132,682 fully fund seventy-seven (77) permanent positions, including salaries and benefits, as well as internship and temporary help positions.

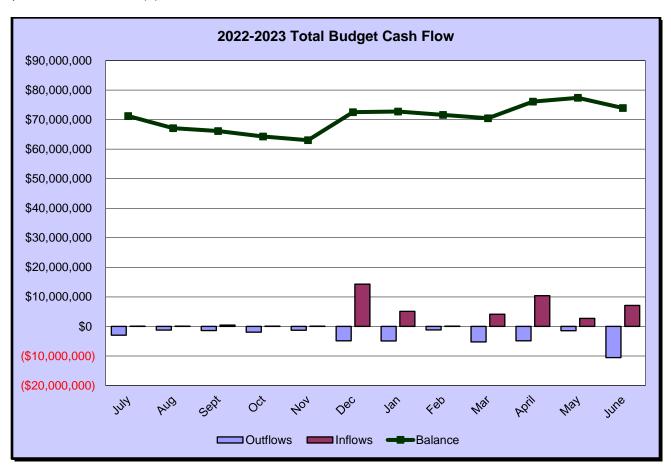

FUND BALANCE

The following chart shows the resources available for the 2022-2023 fiscal year.

Projected	l	
General Fund		\$32,825,460
Capital Projects Fund		
Urban/Rural Construction	\$32,401,571	
Land Sale	\$4,285,566	
Park Construction	\$455,659	\$37,142,796
Debt Service Fund		\$1,350,759
July 1, 2022 Fund Balance		\$71,319,015
2022-2023 Transactions		
Total Revenue	\$27,492,873	
Net Transfers From PPDA	\$3,529,000	
Total Expenditures	(\$28,546,913)	
Net Transactions for 2022-2023	-	\$2,474,960
June 30, 2023 Fund Balance		\$73,793,975

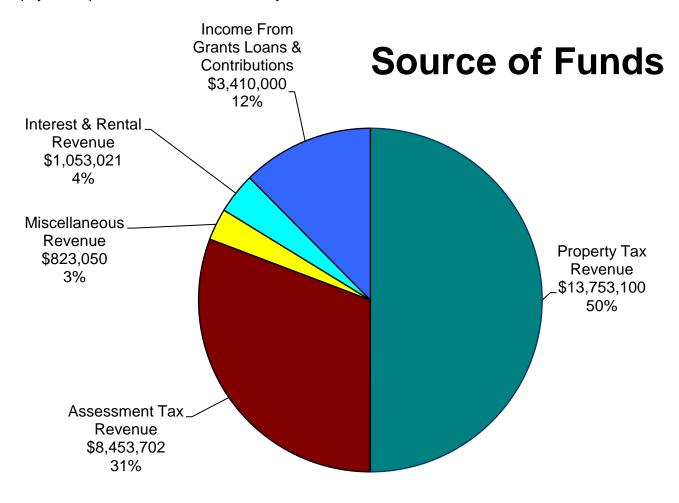

CASH MANAGEMENT

The primary sources of revenue for the District are property taxes and assessments levied by the County of Fresno and paid to the District in three (3) installments each year, 50% at the end of December, 45% at the end of April, and 5% at the end of June. For the period from July 1st until the end of December, the District receives very little incoming revenue requiring the cash balance on July 1st to be sufficient to cover the expenses for this period. The District Act and the proposed Budget provides for this six (6) month reserve.

2022-2023 TOTAL REVENUES

Section 73-22 of the District Act requires the Board of Directors to prepare an Annual Budget each fiscal year to estimate the amount of money needed to fund the objectives and purposes of the District. Pursuant to statue, the revenue portion of the Budget, is determined by the funds needed to pay the expenses of the District for the year.

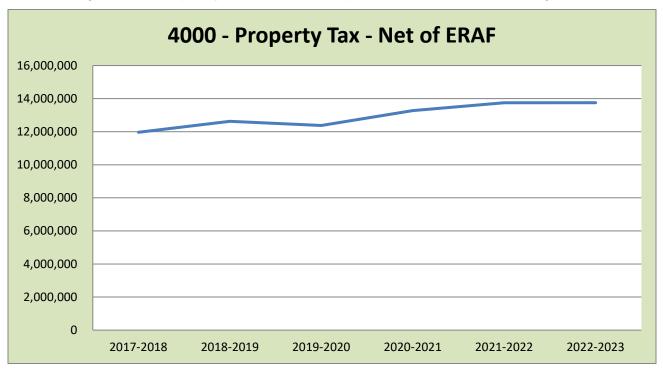

Total Revenue from all Sources						
Property Tax Revenue	\$13,753,100	50%				
Assessment Tax Revenue	\$8,453,702	31%				
Miscellaneous Revenue	\$823,050	3%				
Interest & Rental Revenue	\$1,053,021	4%				
Income From Grants Loans & Contributions	\$3,410,000	12%				
TOTAL REVENUE FROM ALL SOURCES	\$27,492,873	100%				

Property Tax Revenue

The District receives a portion of the County of Fresno Property Tax assessed to all parcels within the District. Property Tax allocations are reduced, by approximately 38.1%, before distribution to the District, to fulfill mandatory property tax shifts to the Education Revenue Augmentation Fund (ERAF). The Fiscal Year 2021-2022 ERAF deduction was \$8,736,399. For Fiscal Year 2022-2023, total net Property Tax revenues are estimated to be \$13,753,100.

Benefit Assessment Tax

Section 73-23 of the District Act requires the Board of Directors to levy an Assessment Tax to fund the annual Budget. As authorized by the voters, such authority to levy an annual Assessment Tax is limited to the amount that could be produced District-wide by a \$0.20 per \$100 of assessed value levy.

Section 73-23.5 provides that the Board of Directors may levy the Assessment Tax authorized pursuant to Section 73-23 on an "ad valorem" basis (if an accurate roll exists), or on the alternative basis of land use, services, and benefits provided. By previous letter, the County of Fresno Assessor notified the District that an ad valorem roll necessary to support such a levy does not exist and would be prohibitively expensive to develop.

In the absence of an "ad valorem" roll, which would permit a fair distribution of system costs, and under obligation to levy an Assessment Tax to fund the 2022-2023 obligations of the District, the Board of Directors must again levy an Assessment Tax based on land use and services and benefits provided (alternative basis).

The levy of the Assessment Tax on the "alternative basis" requires the following determinations:

- 1. Zones of Benefit
- 2. Benefited parcels
- 3. Size of the benefited parcels
- 4. Use of the benefited parcels
- 5. Services and benefits provided
- 6. Amount of the annual Budget required to be raised

Zones of Benefit

Pursuant to a detailed engineering investigation performed relative to the U.S. Army Corps of Engineers' project and examinations by a Citizens Project Advisory Committee, the Board of Directors, at a Public Hearing in 1987, adopted the Zones of Benefit. The Zones have been considered annually and, when determined appropriate by submitted evidence, revised to maintain accuracy.

The levy of the 2022-2023 Assessment Tax requires no change in the Zones of Benefit and no requests for consideration of a zone boundary change have been received.

Determination of Benefited Parcels

Through use of the County of Fresno Assessor's records, all parcels within the defined Zones of Benefit have been identified. A master computer roll has been prepared documenting all relevant information for each parcel, including parcel size, use, Zones of Benefit, and ownership.

The District's parcel roll is reviewed and updated annually to identify changes in any relevant factor (size, use, Zones of Benefit, and ownership) to insure accuracy in the Annual Levy. The County of Fresno Assessor and the District crosscheck their respective rolls to further insure accurate data and levies. When necessary, on-site visits by District staff are made to confirm the accuracy of information or to secure missing information. On average, approximately ten (10) to twelve (12) requests for review are received, processed and appropriate action taken each year.

Determination of Parcel Size

(See discussion above concerning benefited parcels)

Determination of Parcel Use

(See discussion above concerning benefited parcels)

Services and Benefits Provided

The determinations of the Zones of Benefit have defined the areas of the District that receive specific services and benefits of the District's programs. Zones of Benefit 1, 2, and 3 are lands in most direct physical proximity to the structural systems of the District, which generate the District's principle services and benefits.

These lands receive direct and indirect flood protection, local drainage services, water conservation, groundwater replenishment, recreation, water quality, environmental enhancement, and other direct and indirect economic benefits and services. The quantification of the services and benefits relative to Fiscal Year 2022-2023, is defined, at a minimum, by the previously cited Sections of the District Act as the values aggregated in the form of the Annual Budget.

Zone 4 receives less direct and indirect services than does Zones 1, 2, and 3 (in Section 73-7 of the District Act, the Legislature determined statutorily that all lands of the District benefit from its work and services). The Board of Directors has continually determined that under current conditions, the cost of collecting a proportional service/benefit-based Assessment Tax from Zone 4 (Upstream Tributary Area) exceeds the revenue to be derived. On the basis of that conclusion, the Board of Directors had maintained a \$0.00 assessment rate in Zone 4. This is also recommended for the 2022-2023 fiscal year.

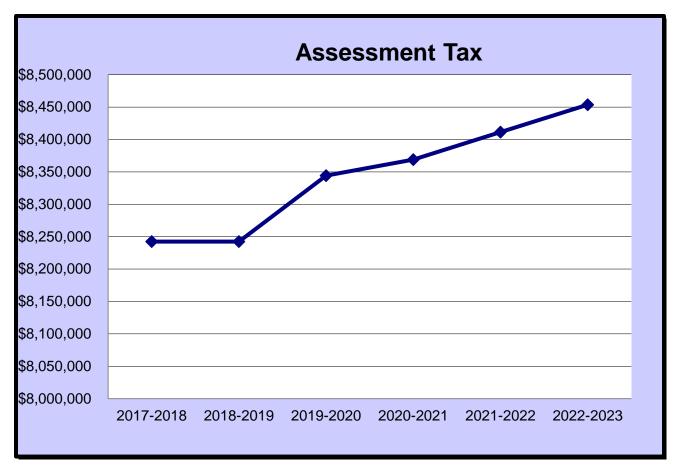

Amount Required to be Raised by Annual Assessment Tax

The District Act, Section 73-23, requires that the Annual Assessment Tax generate "the amount stated in the Annual Budget". Section 73-22 requires the budgeted amount to include routine expenses, systems operations and maintenance costs, non-bonded indebtedness, reserves, authorized projects or actions, and necessary professional services. Also, the sum produced must be sufficient to fund any reimbursements related to the levy or eligible for funding from the levy.

Definitions

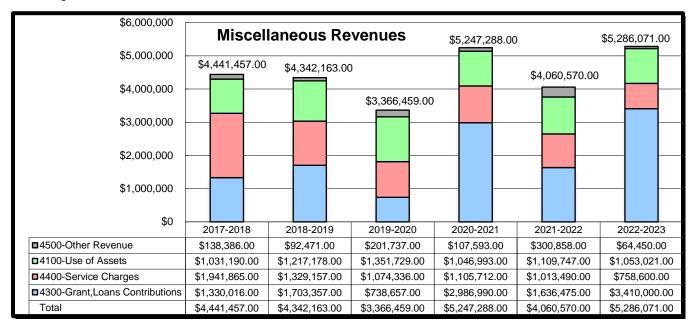

Section 73-28 states, the words hereinafter defined shall be given the meaning stated in this section, unless the context of the word as used at a particular place in the act indicates a different meaning at such place.

- 1. As used in this act,
 - a) "District" means "Fresno Metropolitan Flood Control District";
 - b) "Board" means "Board of Directors of the District";
 - c) "County" means "County of Fresno";
 - d) "City" means "City of Fresno" when the land or works are within the City of Fresno and the "City of Clovis" when the land or works are within that city;
 - e) "Irrigation District" means "Fresno Irrigation District";
 - f) "Board of Supervisors" means "Board of Supervisors of the County of Fresno".
- 2. As used in this act, the words "flood control works" include dams, reservoirs, canals, ditches, drains, the improvement of natural or artificial watercourses, and the acquisition and construction of any and all improvements appurtenant to or necessary for any flood control, drainage, or water conservation work or works, and include the acquisition of any land, easements, property, or rights necessary for the flood control, drainage, or water conservations works.
- 3. As used in this act, the term "public official" means all elected officials and officers, including employees, of the City of Fresno, the City of Clovis, and the County of Fresno.
- 4. Wherever in this act the term "assessment tax" is used, the term shall not be deemed or construed as referring to a tax in the technical sense of the term, but shall be deemed to refer to assessments based on benefits.

Miscellaneous Revenues

Miscellaneous Revenue received by the District includes interest, rental of District property, service charges, and grants. The amount of estimated revenue for these accounts is summarized in the following chart.

GANN APPROPRIATIONS SPENDING LIMIT

Proposition 4 (November 1979), called the Gann Appropriations Spending Limit, is a California constitutional amendment that limits growth of tax funded spending programs. Pursuant to the amendment, a fiscal year 1978-1979 spending level of \$1,888,213 was established for the District as the base for an annual computation called the Appropriations Limit. The Appropriations Limit is computed using the percentage of change in the District's population and the percentage of change in the cost of living. Exempt from the spending limit were expenditures for infrastructure funding. The Appropriations Limit was to prevent the expansion of government spending by limiting certain kinds of revenue. Originally, excess revenues were to be returned to the taxpayers, but in 1988-1989, the California Constitution was amended (Propositions 98 and 111) requiring excess revenue to be split between taxpayer rebates and education funding.

The California Department of Finance keeps statistical values for each jurisdiction except for Special Districts who must determine their own population for computing the Appropriations Limit. Each May 1st, the California Department of Finance makes available the Population and Cost of Living increase or decrease to use for the computations.

Special Districts have the option of using the City or County statistics that match demographics of the Special District's service area, or a Special District can calculate a specific rate blending demographic data from both City and County sources. The District uses the combined populations of the City of Fresno, the City of Clovis and the Unincorporated County of Fresno for its population to produce a blended rate.

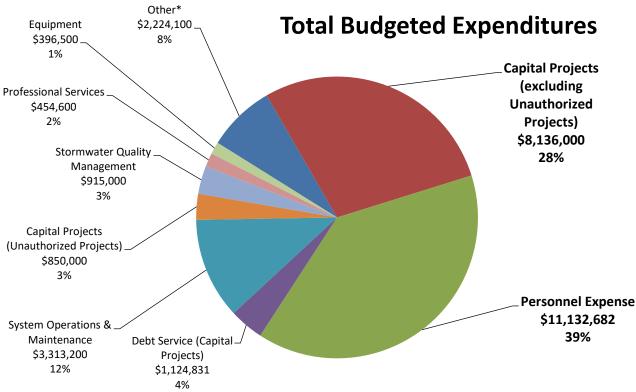

For 2022-2023, the calculated limits are as follows:

- ♦ County of Fresno Index Limit is \$23,265,050
- ◆ City of Fresno Index Limit is \$27,033,546
- ♦ Fresno Metropolitan Flood Control District Index Limit is \$25,728,790.

For the 2022-2023 fiscal year, District revenue subject to the limit is projected to be \$17,488,674. In all three (3) formulas, the District's appropriations are below the Gann Appropriations Spending Limit.

2022-2023 TOTAL EXPENDITURES

Total District expenditures budgeted for the 2022-2023 fiscal year are \$28,546,913. Expenditures are allocated and tracked by account type. The following pie-chart and table illustrate the expenditures by category, and also by the percentage of total expenditures for the 2022-2023 Budget year.

	Total Expenditures by Category							
	Capital Projects (excluding Unauthorized Projects)	\$8,136,000	29%					
	Capital Projects (Unauthorized Projects)	\$850,000	3%					
	Debt Service (Capital Projects)	\$1,124,831	4%					
	Personnel Expense	\$11,132,682	39%					
	System Operations & Maintenance	\$3,313,200	12%					
	Stormwater Quality Management	\$915,000	3%					
	Equipment	\$396,500	1%					
	Professional Services	\$454,600	2%					
*	Insurance	\$318,400	1%					
*	Office Buildings	\$390,000	1%					
*	Office Administration	\$310,220	1%					
*	Other Administrative Expense	\$355,980	1%					
*	Office & Operations Center Expense	\$277,700	1%					
*	Management Support	\$171,800	1%					
*	Budget Reserves - General Fund	\$400,000	2%					
	Total Expenditures	\$28,546,913	100%					
*	Sum total of "Other Expenses" on Pie Chart.	\$2,224,100						

GENERAL FUND – OPERATING EXPENSES

Personnel Expense (5000)

The 5000 account is used to budget all personnel costs. In the prior fiscal year, the Board of Directors authorized a total of seventy-seven (77) regular full-time positions. In the preparation of this year's Budget, the management team from each program area evaluated staffing needs with respect to program objectives, tasks for the upcoming year, and current work assignments. Following staff review, recommendations regarding step increases, promotions, staffing levels, and workloads were made to the General Manager-Secretary for consideration.

Highlights of the Personnel Budget

- ♦ The 2022-2023 recommended Budget includes a total of seventy-seven (77) full-time positions.
- ◆ The Personnel Budget includes funding to implement anticipated salary changes, including: (1) regular salary step increases, (2) advancement of qualified individuals to Step 6 and Step 7, (3) promotions and salary adjustments of individuals in cases where the General Manager-Secretary has determined an organizational need, and (4) professional license incentives for Professional Engineers and Land Surveyors.
- ♦ The Budget includes a cost of living adjustment of 8.7%.
- ◆ A total of \$42,000 is allocated to fund PARS service fees and other retiree health benefit (OPEB) costs.
- Overall, budgeted personnel expenses increased approximately 7.99% year over year.

Personnel Cost Analysis

The Personnel budget includes all employee salary costs associated with the seventy-seven (77) positions in the 2022-2023 Budget year. The following table shows the incremental cost of each recommendation to be implemented in the 2022-2023 fiscal year.

Salary Summary				
July 1 Base Salaries - 77 FT Positions (Including				
Vacant Budgeted Positions)	\$7,186,661			
Position Adjustments	\$0			
Budgeted Vacancies - None	\$0			
Part-Time and Interns	\$50,000			
TOTAL AUTHORIZED POSITIONS	\$7,236,661			
Promotions (In-Line)	\$17,650			
Regular Step Increases (Steps 1-5)	\$73,410			
Non-Regular Step Increases (Steps 6 and 7)	\$36,350			
Position Reclassifications	\$0			
Market/Salary Tier Adjustments	\$0			
Cost of Living (COLA 8.7%)	\$612,831			
Estimated Overtime/On-Call Pay	\$50,000			
ANNUAL TOTAL	\$8,026,902			

Cost of Living Adjustment (COLA) - \$612,831

Board Policy provides for the District to enact annual cost of living adjustments in the salary pay rate paid to each employee; such adjustments are to total not less than 0% or more than 100% of the Consumer Price Index for the State of California. Historically, the District has used the Bureau of Labor Statistics Pacific Western Cities Index for Cities under 1.5 million people. During preparation of the FY 14/15 budget, staff noted indexes for the Western California Fresno area were available. The Fresno area indexes more closely represent the District's employee population and salaries. Therefore, staff considered those indexes when providing COLA recommendations for FY 14/15 to date.

The Fresno area economy data contains two indexes: consumer price index for all urban consumers (CPI-U) and consumer price index for urban wage earners and clerical workers (CPI-W). The CPI-U reflects the expenditure patterns of an average consumer living in an urban area (about 89 percent of the U.S. population). The CPI-W reflects the expenditure patterns of urban consumers who live in a household where more than one-half of the household's income originates from clerical or wage occupations (blue collar), and at least one of the household's earners has been employed for 37 weeks or more during the previous 12 months (about 28 percent of the U.S. population).

The District will base COLA recommendations on the Fresno area CPI-U for March of each year, which is a more accurate indicator of the local area and employees' occupations.

For March 2022, the CPI-U annual index for Fresno was 8.7%. After careful review of the index and market trends over the past several years, staff recommends a COLA of 8.7%.

It is important to note that virtually all local agencies, with the exception of FMFCD, are governed by multiple Memorandums of Understanding (MOU's), which traditionally guarantee a cost of living increase through contract negotiations. When conducting this year's salary survey to develop the salary adjustments listed below, it was reported that multiple agencies are revising salaries to further address challenges in the market; employer representatives are recommending additional salary adjustments to attract high quality candidates and address retention of qualified staff.

In the past five (5) years, local agency staff has not only agreed to the increases shown in the table below, they have also addressed prior years' salary deficiencies by agreeing to cash payments at MOU renewal, addressing prior contract periods. These one-time cash payments are essentially retroactive salary adjustments, which are not captured during the annual salary surveys since those surveys address changes to salaries going forward.

Agency	2018-2019	2019-2020	2020-2021	2021-2022	2022-2023	5 year total
City of Clovis	3.5%	2.0%	2.0%	2.0%	3.66%	13.16%
City of Fresno	2.5%	2.5%	2.5%	2.5% - 3.0%	2.0% - 3.0%	12.0% - 13.5%
County of Fresno	2.5% - 4.0%	2.0% - 3.0%	3.0% - 5.0%	2.0% - 5.0%	3.0%	12.5% - 20.0%
SJV Air Pollution Control District	3.0%	3.0%	4.0%	3.0%	2.5%	15.5%
Fresno Irrigation District	2.5%	1.5%	2.9%	2.5%	1.7%	11.1%
Fresno Metropolitan Flood Control District	3.3%	2.4%	2.5%	2.4%	8.7%	19.3%
Western Urban Fresno	3.3%	2.1%	2.5%	2.4%	8.7%	19.0%
Western Cities CPI	2.8%	2.4%	2.5%	2.9%	9.4%	20.0%

Provisional Positions - \$50,000

The proposed Budget includes \$50,000 for non-regular, part-time positions and internships. During prior years, the District has benefited from having part-time positions and interns in various District programs. This has been a very positive program. Generally, the focus will be on the following staffing: Engineering Intern, Park Attendant, and other temporary technical help on an as-needed basis.

Promotions - \$17,650

Promotions are based on organizational needs and the ability, skills, and productivity of individuals to perform work at a higher level. District policy designates the General Manager-Secretary the authority to grant promotions based on responsibility of the assigned position, experience level demanded of the position, degree of merit exhibited by the incumbent, and other relevant factors, including the program needs of the District. Promotions can either be 1) an "inline promotion", which is a new level within the same job family (I, II, III, Senior) or 2) an "organizational promotion", which is a new position assignment at a more supervisory/manager level. This Budget anticipates the need for promotions that would be awarded as appropriate throughout the year. The Personnel section of the Budget does include funding for five (5) promotions during this budget year.

Regular Step Increases (Steps 1 - 5) - \$73,410

The District's salary structure is comprised of a five-step pay range for each position. Each year, those employees who have not reached the fifth step in their salary range are evaluated to determine if their performance merits advancement to the next step. The Budget includes funds for twenty-nine (29) step increases between Step 1 and Step 5.

Non-Regular Step Increases (Steps 6 – 7) - \$36,350

Employees who have exhibited exemplary service to the District and have reached Step 5 in the highest range available for the employee's position may be eligible to move to a Step 6 position, following five (5) years of service in the Step 5 position, with the approval of the General Manager-Secretary. Following ten (10) years of service in the Step 6 position, an employee who has exhibited exemplary service to the District and approval of the General Manager-Secretary may be eligible to move to a Step 7. Two (2) employees are eligible for Step 6 and three (3) employees are eligible for Step 7.

Employee Benefit Costs Analysis

Employee benefits make up approximately 21.7% of the total Personnel Budget. The District provides a variety of benefits, including health, dental, vision, life, and disability insurance. Additionally, the District funds a defined contribution employee pension plan. The retirement benefit provided is equal to 10% (14% for employees hired before July 1, 1988) of an employee's salary, which is deposited into the money purchase pension program. Employees must contribute a minimum of 5% (6% for employees hired prior to July 1, 1988) to the plan as the employee's share of the pension plan. All funds are now employee directed investments through the Mission Square Retirement program. The following table lists the total cost for each benefit.

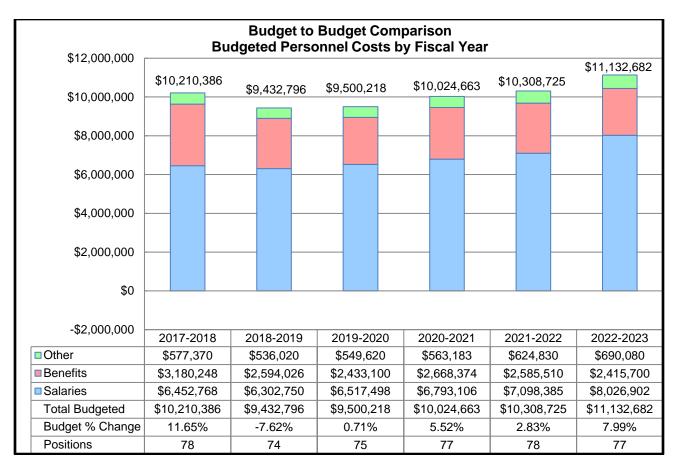

Summary of Benefit Costs					
Health Insurance		\$1,223,000			
Dental Insurance		\$112,200			
Vision Insurance		\$18,000			
Life Insurance		\$8,000			
Disability Insurance		\$34,000			
OPEB Funding		\$42,000			
Retirement		\$812,000			
Annual Leave		\$164,000			
Employee Assistance Program		\$2,500			
	Total	\$2,415,700			

The Association of California Water Agencies – Joint Powers Insurance Authority (ACWA-JPIA) is self-insured for its health benefits plans to allow for more rate stability, broader coverage, and expanded benefits and services than private insurance. ACWA-JPIA continues to work very aggressively on behalf of member agencies to provide robust benefit plans at a fair and reasonable cost. Increases for 2022 health plans are budgeted based on ACWA-JPIA's recommendations.

- ♦ Anthem Blue Cross PPO Plans: 0% increase
- ♦ Anthem Blue Cross California Care HMO: 6% increase
- ♦ Kaiser Permanente Plans: 4% increase
- ◆ Delta Dental PPO: 0% increase
- ♦ Vision Service Plan (VSP): 0% increase
- ♦ Employment Assistance Plan: 0% increase

Other personnel costs make up approximately 6.2% of the total Personnel Budget. The District provides other personnel costs, including payroll taxes (employer Social Security and Medicare taxes), worker's compensation insurance, unemployment insurance, and temporary help. The following table lists the total for other personnel costs.

Summary of Other Pe	rsonnel Costs	3
Payroll Taxes		\$569,000
Workers Compensation Insurance		\$101,080
Unemployment Insurance		\$15,000
Temporary Help		\$5,000
	Total	\$690,080

Office Administration (5100)

The Office Administration accounts budgeted expenditures for this fiscal year are \$310,220. This account series is for budgeting general office supplies, small furnishings, postage for office mailings, office equipment and furniture maintenance, computer equipment maintenance, office and field communications, website and computer communications and ongoing software subscriptions.

The Computer Components & Supplies account is used for all upgrades and equipment needed to maintain the District's fourteen (14) servers and one hundred and twenty-five (125) computers/devices. Other key expenditures include:

Account 5111 – Office Supplies: This account is for purchasing office supplies, which includes toner and ink cartridges for printers, calculators, desk calendars, snap frames, lighting accessories, copy paper, first aid safety supplies, desk accessories, Covid-19 supplies and other miscellaneous items. This account is budgeted at \$25,000.

Account 5113 – Small Furnishings: This account is to purchase small office furniture and equipment under \$2,000. For this fiscal year, a total of \$25,000 has been budgeted to replace window blinds as needed throughout the offices, ergonomic task chairs for staff and to purchase small office furniture.

Account 5120 – Maps and Records: Funds for this account are budgeted for outsourcing services to convert District documents into digital images, document destruction services and accessories for mapping supplies and maintenance. This account is budgeted at \$26,000.

Account 5144 – Computer Software and Upgrades: This account funds all ongoing licensing of software used by District staff including document management, Auto-CAD, Geographic Information System (GIS) software, word processing, and others. In total, this account is budgeted at \$147,420.

Account 5151 – Office Communications: This account funds all of the District's local and long distance phone services, conference call services, cell phone services and upgrades and office phone purchases and accessories. This account is budgeted at \$5,000

Account 5153 – Web Site & Computer Communications This account funds all related needs to operate the District's website and provide Internet access. This account is budgeted at \$23,000, which includes website maintenance.

Management Support (5200)

The Management Support account group funds all expenses for the District to conduct annual planning conferences, meetings with other local agencies, professional education and training of District staff, participation of the District in-state and national flood and stormwater associations, and participation in the Economic Development Corporation (EDC) of Fresno County. This account is budgeted at \$171,800.

Insurance (5300)

The District manages risk through a number of different insurance policies primarily through participation in the Association of California Water Agencies-Joint Powers Insurance Authority (ACWA-JPIA). The District entered into a Joint Powers agreement, along with other members of the Association of California Water Agencies (ACWA), to form a self-insuring pool for liability coverage up to \$5,000,000. Insurance in excess of \$5,000,000 is collectively purchased through excess policies covering all members. The excess insurance is for \$55,000,000 per occurrence, for a total coverage of \$60,000,000 per occurrence. ACWA-JPIA recently created a "Captive Insurance Company" (California Water Insurance Fund), domiciled in the State of Utah, to maximize their investments and keep insurance cost down. The District participates in the property damage pool, the liability pool and the workers' compensation pool.

Liability Coverage – The general liability program provides protection against liability for bodily injury, property damage, errors and omissions, employment practices, fiduciary responsibility, products, and pollution. For the 2022-2023 fiscal year, the premium is estimated to be \$240,900 for general liability and \$53,400 for property coverage.

Fiduciary Insurance - The District Board of Directors and the General Manager-Secretary have a fiduciary responsibility in making employee benefit related decisions. During 2018-2019 the liability limit of \$2,000,000 was increased to \$5,000,000 per occurrence. The estimated fiduciary insurance premium is \$12,500 for the 2022-2023 fiscal year.

Employee Bonding - The District carries \$1,000,000 of coverage for employee dishonesty, fraud or other crimes issued through Fidelity & Deposit Company. The premium for the 2022-2023 fiscal year is estimated at \$1,600.

Professional Services (5400)

Professional Services includes legal services, accounting and auditing services, computer programming, computer maintenance, and other miscellaneous contracted services related to personnel and benefit plans.

Legal Services - Legal Services are categorized based upon the type of service provided. Categories include administrative, legislative, land acquisition, litigation, and Board assignments. In preparing the estimated budget for legal services, Legal Counsel estimates the services required for the upcoming year. Some of the costs are predictable, including participation at Board Meetings, legal review of agreements, legislative costs, and contract review. However, predicting time spent on litigation, defense of claims brought against the District, and unforeseen legal matters are at best a general estimate. Because of this, assignments to Legal Counsel are reviewed by the General Manager-Secretary; any unforeseen expense beyond the Budget amount would be reviewed by the Board of Directors for consideration. Services for 2022-2023 are budgeted at \$158,000.

Accounting Services - Accounting Services include fees associated with the preparation of financial statements, auditing of the District financial records, auditing of the District's retirement plan, and audit requirements related to federally funded projects. For 2022-2023, the budget is \$39,000.

Other Professional Services - Other Professional Services are budgeted at \$257,600, which includes:

- Computer related services of \$5,000 for network and server upgrade consulting.
- Other professional services for \$234,000.
 - DWR Prop 84 Emergency Plan Drafting of \$53,500 and DWR Prop 84 Training class of \$152,000.
 - Payroll Services \$18,500.
 - Property Tax Consultant \$10,000
- Consulting Engineers \$600.
- Legislative services to support efforts for long-term planning are budgeted at \$5,000.
- Personnel and employee benefit administration services are estimated to be \$13,000.

Other Administrative Expense (5600)

The primary expense in this category is a reimbursement to the County Auditor-Controller-Tax Collector of \$261,000 for collection and distribution of the District's share of the property tax. Expenses are proportionally allocated to each agency receiving a portion of the property tax. This category also includes the Board of Directors expense budget of \$53,400. The cost for all public notices and information is estimated to be \$23,500

System Operations & Maintenance (5700)

The Operations and Maintenance Budget for the 2022-2023 fiscal year totals \$3,313,200. Costs associated with this Budget pay for developed basin maintenance, undeveloped basin maintenance, recharge maintenance, pump operation and maintenance, flood control structure maintenance, and channel maintenance.

- ♦ Developed basin maintenance costs are budgeted at \$800,000. This includes twenty (20) mowings per year, sprinkler repairs, water costs, tree trimming, and other miscellaneous costs on approximately 250 acres of landscaped area.
- ◆ Undeveloped basin maintenance is budgeted at \$400,000. This includes three (3) maintenance cycles per year, monthly trash removal, rodent control, and other miscellaneous costs on approximately 1,760 acres of land.
- ◆ The maintenance of basins for the purpose of improving groundwater recharge is budgeted at \$150,000. Currently, there are ninety-eight (98) basins in the groundwater recharge program. Fifteen (15) are scheduled for maintenance in the 2022-2023 fiscal year. The cleaning process includes draining the basin completely and scraping accumulated silts off of the basin floor. Silts are hauled to partially excavated basin locations where they are mixed with other soil types increasing the usability of the material as fill material. Costs associated with recharge maintenance are increasing due to increased hauling costs, further hauling distances, increased fuel costs, security costs to protect pumps from vandalism, and more basins in the recharge program.
- Parks and recreation expense for Basins "D" (Oso de Oro Lake Park), "Y" (Trolley Creek Park), "TT", and "FF", are budgeted at \$55,000. This includes preventive damage measures, including increased security and rapid graffiti removal. Other costs include play equipment maintenance, restroom supplies, janitorial supplies, and miscellaneous repair costs.
- While difficult to predict, winter operations costs for pump fuel, barricades, contracted labor, and security are estimated to be \$25,000.
- Fence repairs are budgeted at \$110,000 for the urban area and \$12,000 for the rural area. This includes increased costs due to vandalism and theft.

- Pump maintenance and operation costs are budgeted at \$325,000. The District owns ninety-six (96) permanent pump stations with a total of 136 pumps. An additional thirty-three (33) pumps are used as booster pumps to provide adequate pressure for irrigation of basin landscaping. The primary cost in this account is electrical power needed for pump operations. Electricity costs overall are increasing and this Budget anticipates increases expected for the upcoming year. Additional costs include preventive maintenance, repair of pumps, and electrical safety analysis, pump station foundation settlement repairs and other upgrades.
- ♦ Flood control operations and maintenance costs are budgeted at \$845,000. This includes dam maintenance, channel maintenance, and detention basin maintenance costs.
- ♦ Vehicle operations and maintenance costs are budgeted at \$205,000. The District owns and maintains a fleet of twenty-two (22) vehicles and reimburses employees for use of personal vehicles. The largest single cost in this account is fuel estimated to be \$120,000 for the upcoming budget year. Additional costs are vehicle repairs, employee mileage reimbursements, and miscellaneous supplies used to equip the existing fleet of vehicles.
- ♦ Other operational expenses are estimated to be \$123,500, which includes field equipment maintenance, uniforms, telemetry maintenance, and other supplies.
- Environmental management costs for operations and maintenance are planned at \$142,700. This
 includes costs to secure necessary permits, authorizations to conduct District operations and
 maintenance programs.

Office & Operations Center Expense (5800)

Costs to operate and maintain the District offices, maintenance facilities, and operations center is budgeted at \$277,700. The following are the primary costs in this category.

- Electricity, water, waste disposal, alarm monitoring, and fire protection are estimated at \$133,700.
- Building maintenance includes janitorial services and supplies, linen service, pest control, HVAC Services, and all other maintenance services. The amounts budgeted for these accounts total \$99.500.
- ◆ Landscaping maintenance is budgeted at \$27,000.

Stormwater Quality Management (7000)

The total budgeted cost for Stormwater Quality Management is \$915,000. The District is the lead agency responsible for coordination and implementation of the Fresno/Clovis Metropolitan Area Stormwater Quality Management Plan (SQMP). This plan, required by Federal and State Clean Water Laws as part of a National Pollutant Discharge Elimination System Permit (NPDES), is intended to reduce pollutants in stormwater to the maximum extent practicable through the implementation of best management practices in the following areas:

- Program Management,
- ♦ Construction.
- Industrial and Commercial,
- Municipal Operations,
- Illicit Connection and Discharge Control,
- Public Involvement and Education,
- Planning and Land Development, and
- Monitoring

Implementation of the plan includes an ongoing monitoring program of the San Joaquin River, preventative maintenance of Regional Stormwater Management Basins, and various media campaigns to promote awareness of clean stormwater initiatives in our metropolitan area. By law, NPDES permits are issued for a maximum of five years. The District's most recent permit expired in May 2018, but was administratively extended until several water quality analyses are completed and the current Stormwater Quality Management Plan (SQMP) is updated. The new permit will be a regional general permit that will cover many Phase I cities in the Central Valley. In order to obtain

coverage under this new General Permit, the Co-Permittee's Notice of Intent (NOI) was submitted to the Central Valley Waterboard on April 30, 2018. Obtaining this coverage is an arduous, multi-year effort that is expected to be finalized in June of 2024. Nearly all expenses will be included in detailed scopes of work that will be presented to the Board of Directors for approval in early fall of 2022. The total program cost for the 2022-2023 fiscal year includes expenses in the following areas:

- ♦ The NPDES permit renewal expenses are budgeted at \$30,000. This is primarily for consulting services to prepare the Reasonable Assurance Analysis (RAA) and the prioritization of water quality constituents as required by the General Permit.
- Municipal NPDES Program Development expenses are budgeted at \$45,000. This will include costs for contracted services to assist in modifying programs associated with the new NPDES municipal stormwater permit. These expenses include funds to develop content for our multimedia marketing campaign, fund participation in the Our Water Our World (OWOW) program, conduct basin design study, and update the San Joaquin River Sampling Plan.
- ♦ Stormwater Quality Management Operations and Maintenance costs are budgeted at \$375,000. These funds relate to ongoing basin maintenance operations including dewatering, vegetation removal and disposal, trash removal, sediment removal, soil sampling, and maintenance of siphons and outfall structures.
- Municipal NPDES Program Implementation expenses are budgeted at \$465,000. The single largest expenditure is the implementation of the Public Involvement and Education (PIE) program, which includes public service announcements, the Clean Stormwater Grant Program, outreach materials, and other implementation expenses (\$188,000). Followed by expenses related to water quality monitoring of the San Joaquin River (\$148,000), which includes funding for one (1) additional pyrethriod monitoring event and preparation of comprehensive water quality reports. This is a mandatory element of the District's NPDES permit that includes sampling the river at three (3) locations during three (3) wet weather storm events and one (1) dry weather event. This account also includes the municipal NPDES stormwater permit fees (\$124,000), which is paid by the District for the benefit of the Co-Permittees. Illicit Connection and Discharge control expenses, including investigation and characterization, are also included in this section.

Budget Reserve-General Fund

The Budget Reserve account has been added to the General Fund in this Budget to provide funding for unknown expenses that might arise during the fiscal year. With the elimination of vacant positions in the Budget, the reserves provide a funding resource for unexpected position hiring that could be brought to the Board of Directors during the fiscal year. The reserves also provide funds for market/salary tier adjustments associated with salary surveys that will be performed during the fiscal year to insure continuity of positions and salary with other agencies. The reserves are also available for increased costs for budgeted items that are planned for expenditure in the General Fund.

CAPITAL EXPENDITURES

2022-2023 Capital Expenditures-General Fund

Office Buildings (6000)

A total of \$390,000 is budgeted for Office Buildings. This includes \$350,000 to re-roof and replace HVAC units on Building 2, and \$40,000 to reseal the asphalt parking lot on the District campus.

Equipment (6100)

A total of \$396,500 is budgeted to purchase new, or replace existing equipment.

- Office Equipment and Furniture expenditures for this fiscal year are \$86,500. The major expense
 in this category is for computer hardware at \$43,000 that includes upgraded workstations, and
 upgraded servers. It also includes the cost to purchase fourteen (14) new computer workstations
 and two (2) servers.
- ◆ Field Equipment expenditures are planned at \$260,000. This includes \$247,000 to replace six (6) vehicles, all six (6) vehicles were ordered during 2021-2022 Budget but will not arrive until after July 1, 2022.
- Communications and Telemetry expenditures are budgeted at \$50,000.

2022-2023 Capital Expenditures-Capital Projects Fund

Planned land, engineering and capital improvement expenditures for the 2022-2023 fiscal year in the Capital Projects Fund total \$8,986,000. This includes expenditures for all capital improvement projects. Line item detail for each expenditure, within each fund, is listed in the Capital Projects Fund Schedule. In addition, a diagram of each project is included in Appendix 1, 2022-2023 Capital Improvements.

Resources Appropriated for Future Year Expenditures

At the end of the 2022-2023 fiscal year, this Budget anticipates that \$41,663,396 will be carried forward for future projects. All of the assets have been allocated to specific capital improvement projects. All Future Projects are listed in the Capital Projects - Future Schedule of the Budget. Projects include:

- Land Acquisitions
- Basin Completions
- ♦ FMFCD Urban Pipeline Projects
- ♦ FMFCD Rural Streams Projects
- Unauthorized Improvements

DEBT SERVICE FUND EXPENDITURES

California Infrastructure and Economic Development Bank loan totaled \$20,000,000 and was used exclusively for infrastructure construction in an older area of the City of Fresno (Drainage Areas "II" & "RR"). As of June 30, 2004, the entire loan had been funded. Annual debt service payments are about \$1.2 million. A principal and interest payment is due each August and interest only payments are due each February. The remaining principal balance due as of June 30, 2021 was \$9,562,537. The final payment will be due August 1, 2030.

Loan	Annual Payment	Total Advance	Remaining Balance	Final Payment
CIEDB Loan	\$1,124,831	\$20,000,000	\$9,562,537	August 2030

PRE-PAID DRAINAGE ASSESSMENT (PPDA) TRUST FUND

The District funds construction of planned local drainage facilities and improvements with Drainage Fees. The Drainage Fees are collected at the time a parcel of land is developed or divided. These fees are intended to pay for all or a major portion of the cost of the drainage facilities and improvements identified in the Fresno Metropolitan Flood Control District, Storm Drainage and Flood Control Master Plan. Each year, the Drainage Fee rate schedules are reviewed by the Board of Directors and amended as necessary to cover the total system cost.

The Pre-Paid Drainage Assessment Trust Fund (PPDA Trust Fund) is designated a Special Revenue Fund as required by the Governmental Generally Accepted Accounting Principles (Governmental GAAP). It is used to account for Drainage Fees collected as specified in the Subdivision Map Act, The Mitigation Fee Act, and the District's Drainage Fee Ordinance. A Trust account has been established for each planned local drainage area. As drainage fees are received, they are deposited and posted to the specific Trust account of the appropriate drainage area. Also designated as an Expendable Trust Fund, the funds are restricted and may only be used to fund construction obligations relating to the District's Storm Drainage and Flood Control Master Plan as listed below:

- 1. Construct drainage facilities;
- 2. Reimburse developer obligations resulting from construction;
- 3. Pay for debt service obligations whose funds were used exclusively to purchase or build planned facilities; and
- 4. Reimburse construction expenditures that were advanced by the District for construction in specific drainage areas.

ATTACHMENT 1 - DEFINITION OF TERMS

Association of California Water Agencies (ACWA) – A non-profit organization representing and providing services to water agencies throughout California. Services provided by ACWA include assistance on regulatory issues, policy development, human resources, and employee benefit programs.

ACWA-Joint Powers Insurance Authority (ACWA-JPIA) – The ACWA-JPIA provides workers' compensation, general liability and property damage insurance coverage and related services to its member agencies.

Appropriation – A legal authorization granted by a legislative body to make expenditures and to incur obligations for a specific purpose.

Assessment Tax (AT) -

Special assessment amounts levied against certain properties.

Assessed Valuation (AV) – The total value, assigned by the County Assessor, of all land, improvements and taxable personal property within the District. Used in the computation of the District's maximum annual assessment tax levy.

Benefits – Payment to which participants may be entitled under a pension plan including pension benefits, death benefits, and benefits due on termination of employment.

Budget – An estimate of the expenditures of a fiscal year and the means proposed to finance them.

California Infrastructure and Economic Development Bank (CIEDB) – The source of the State Infrastructure Loan Contract as a debt service reserve for the loan payments.

Consumer Price Index — An index measuring the change in the cost of typical wage-earner purchases of goods and services expressed as a percentage change in the cost of these same goods and services in some base period.

District Act – The legislation that created the District. Formally known as the Fresno Metropolitan Flood Control Act, it is located in Chapter 73 of the State of California Water Code Appendix. The District Act was approved by the voters in 1956.

District Services Plan (DSP) – A comprehensive document used to describe the mission and general organization of the District, and describes the flood control, urban stormwater drainage, and related programs and services that are provided by the District.

Encumbrances – Commitments related to unperformed contracts for goods and services.

Economic Development Reserve – Created by the Board of Directors to fund specifically qualified projects linked to regional economic development objectives.

Fund – A fiscal and accounting entity with a self-balancing set of accounts in which cash and other financial resources, all related liabilities, and residual equities or balances and changes therein are recorded and segregated to carry out specific activities or attain certain objectives in accordance with special regulation, restrictions, or limitations.

Fund Balance – Defined as Assets minus Liabilities.

GAAP – Generally Accepted Accounting Principles.

General Fund (GF) – The primary operating fund of the District.

Educational Revenue Augmentation Fund (ERAF) – Created by the State to receive and redistribute to schools, a defined portion of the property tax revenues otherwise received by all other units of local government.

Local Cooperation Agreement (LCA) – The Master contract with the U.S. Army Corps of Engineers governing the construction, operation, maintenance, repair and financing of the Redbank-Fancher Creeks Flood Control Project.

Non-Conforming Facilities Fees (NCFF) – Charges collected by the District representing prepaid maintenance for non-Master Plan facilities accepted by the District for perpetual operation and maintenance from public and private entities.

National Pollutant Discharge Elimination System (NPDES) – The Federal Clean Water Act regulatory sections requiring this issuance of a formal permit to discharge regulated wastewater (including stormwater) to waters of the U.S.

Office of Emergency Services (OES) – The State entity through which eligible flood damage, flood fight costs are reimbursed, in coordination with the Federal Emergency Management Agency (FEMA).

Operating Budget – Plans of current expenditures and the proposed means of financing them. The annual operating budget is the primary means by which most of the financing, acquisition, spending, and services deliver activities of a government are controlled.

Park Construction Fund – A special set-aside account into which basin maintenance cost savings produced by the Association of Retarded Citizens (ARC) contract are deposited and held for the purpose of accelerating basin landscaping.

Pre-Paid Drainage Assessment (PPDA) – The formal name of the proportionate share of drainage system costs paid by developers as a condition of securing a development entitlement (also known as "Drainage Fees").

Reserved Fund Balance – The portion of the fund balance that is (1) not available for appropriation or expenditure and/or (2) is segregated legally for a specific future use.

Storm Water Quality Management (SWQM) – The specific program conducted under order of, and to implement the requirements of the District's NPDES permit.

Unreserved Fund Balance – The portion of the fund balance that is not appropriated for expenditure or legally segregated for specific future use.

2022-2023 Capital Improvements Table of Contents

Budget Item Number	Description	Budget Amount	Anticipated Award Date
item Number	Description	Aillouilt	Awaru Date
	<u>Improvements - Basins</u>		
	Basin Fencing		
1	DM (PPDA: \$25,000)	\$240,000	4th Quarter
	,		
	Basin Pump Stations		
2	AH ₁ (PPDA: \$60,000)	\$590,000	3rd Quarter
3	BB (Upgrade)	\$120,000	3rd Quarter
4	X	\$610,000	4th Quarter
	Basin Relief	ı	
5	EF	\$125,000	2nd Quarter
	Basin Street Improvements	r .	
6	EF, Cornelia Street Improvements	\$55,000	2nd Quarter
	Basin Completions		
7	DH, Landscape (PPDA: \$225,000)	\$225,000	4th Quarter
	Basin Clearing		1
8	General	\$25,000	4th Quarter
9	AV	\$25,000	4th Quarter
10	DM	\$25,000	4th Quarter
	Basin Slope Stabilization		
11	Various Basins	\$20,000	2nd Quarter
	Desir Oradina 9 Europetica		
40	Basin Grading & Excavation	ΦE0 000	445 0
12	Priority Basin Grading & Excavation	\$50,000	4th Quarter
13	BX, Priority Excavation	\$30,000	4th Quarter

2022-2023 Capital Improvements Table of Contents

Budget		Budget	Anticipated				
Item Number	Description	Amount	Award Date				
<u>Improvements - Pipelines</u>							
	City of Fresno Projects						
14	BE, Peach Ave Pipeline: Hamilton to Geary (PPDA: \$57,000)	\$505,000	2nd Quarter				
	City of Clovis Projects						
15	7H, Locan Avenue: Herndon to Polson	\$280,000	2nd Quarter				
	County of Fresno Projects						
16	BQ, Fowler and Olive	\$45,000	2nd Quarter				
	FMFCD Urban Pipeline Projects						
17	2D, Pipeline from Holland to Eddy (PPDA: \$375,000)	\$430,000	3rd Quarter				
18	BH, Pipeline in Columbia to Clovis Avenue (PPDA: \$365,000)	\$530,000	3rd Quarter				
19	BS, McKinley: Basin to Armstrong	\$540,000	4th Quarter				
20	CO ₂ , Farris (CO ₂ -20)	\$150,000	3rd Quarter				
21	FF, Abby and McKenzie	\$50,000	3rd Quarter				
22	SS, M.L.K.: Amber to Annadale	\$100,000	4th Quarter				
	II/RR - Infrastructure						
23	II1, O St. to Topeka (II1-114) (PPDA: \$52,000)	\$800,000	3rd Quarter				

Budget Item Number	Description	Budget Amount	Anticipated Award Date				
Improvements - Rural Systems (ATF)							
Rural Improvement Projects							
24	BDR, Floodproof Wells	\$200,000	4th Quarter				
25	BDR, Watershed Monitoring (WaterSMART: \$58,000)	\$125,000	3rd Quarter				

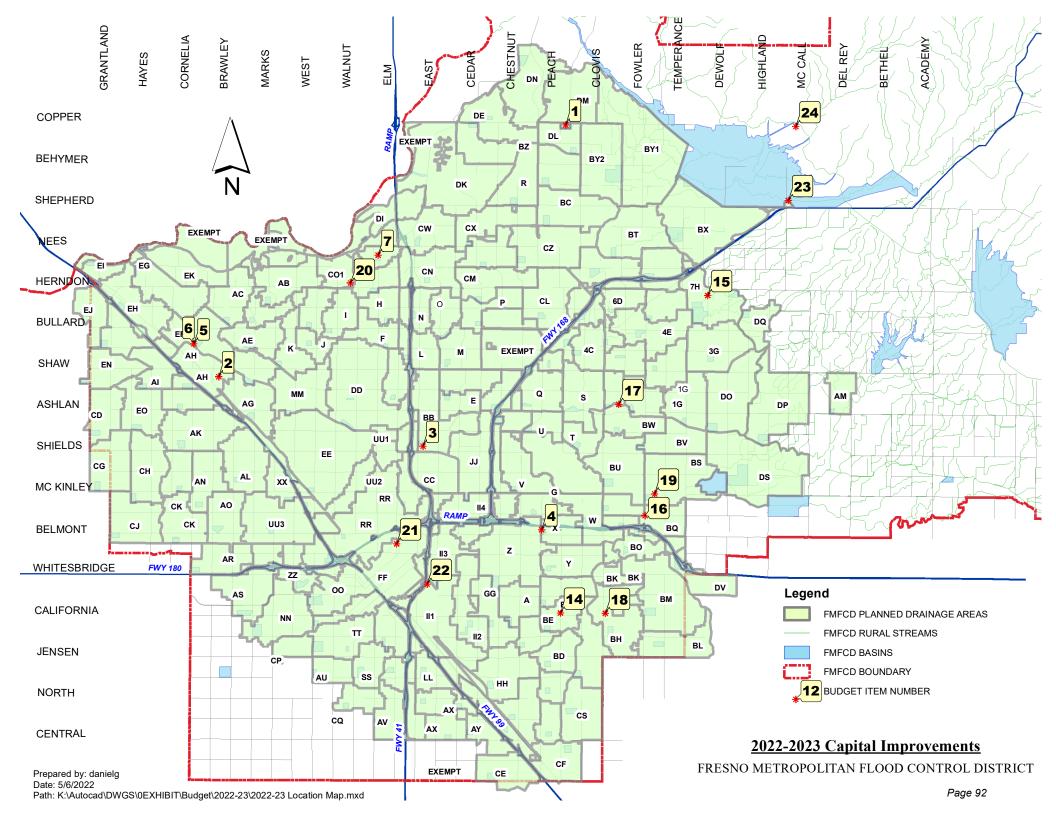

Drainage Control Expenditures:		Fund Source	Budget
1, 2, 3	8,4 Quarters		
	URBAN INCIDENTAL EXPENDITURES	URBAN FUND	\$100,000.00
	RURAL INCIDENTAL EXPENDITURES	RURAL FUND	\$25,000.00
