**5.100 Purposes.**

The Board of Directors of the Fresno Metropolitan Flood Control District (District) finds and determines that land is a valuable resource to use for the public benefit to the maximum extent possible. District storm water and flood control facilities shall be developed for particular secondary uses based on public need, location, surrounding land use, soil conditions and other factors. All District facilities which have been developed into open space park facilities shall be open to the public at all times except during periods of construction, maintenance and normal rainfall months from October 31 to April 1 of each year, and as may be necessary to protect public health and safety.

This Ordinance shall regulate recreational use of District open space park facilities in order to ensure their continued safe use, to prevent the creation of potential nuisances, and protect the integrity of the system for storm water and flood control. In the case of basin parks, covered by agreement with another public entity, the agreement will take precedence over the ordinance.
